

Md Tanjiquir Rahman Prince

DevOps Engineer (Full-Stack Background)

☎ +8801792615335 @ tanjiqprince@gmail.com in linkedin.com/in/tanjiqur-rahman-prince
📍 Mirpur-10, Dhaka, Bangladesh 🌐 github.com/trPrince

DevOps Engineer with experience automating deployments, managing CI/CD pipelines, and orchestrating containerized environments in Azure and DigitalOcean. A strong full-stack background enables deep visibility throughout the development lifecycle and rapid debugging of complex deployment issues. Committed to continuous learning. Currently learning and interested in growing towards infrastructure automation.

</> SKILLS

CI/CD	Github Actions, ArgoCD
Docker & K8s	Docker, Docker Compose, Kubernetes, Helm
Infrastructure as Code	Terraform, Ansible
Cloud Providers	DigitalOcean, Azure
Security & Networking	Reverse Proxy (Traefik, Nginx), SSL with Cert Manager, Sealed Secrets
Web Libraries & Frameworks	Next.js, React.js, Vue.js, Hardhat, ethers.js, Gun.js, Odoo
IDEs	VS Code, Cursor, Lens

📁 WORK EXPERIENCE

Full-Stack & DevOps Engineer

Indetechs Software Limited

May 2022 - Present

Healthcare | Federated learning platforms (Flute and Trumpet) for Healthcare Research

flute.iw.technovativesolutions.co.uk

- Automate deployments and slack alerts through CI/CD pipelines using GitHub Actions on self-hosted runners.
- Own and manage the Github organization and Azure subscription to ensure smooth and ISO compliant access to resources.
- Own all deployment responsibilities of the team.
- Develop multiple modules of the frontend applications using NextJs.

BYO-DPP, DPP | Build Your Own DPP, Digital Product Passport

digiprodpass.com

- Maintained multi-environment (dev, staging, prod, demo) CI/CD pipelines and deployment workflows.
- Managed and modified ArgoCD repositories for GitOps-based deployment.
- Use helm charts to configure and deploy services such as Keycloak, Cert Manager, and Sealed Secrets.
- Plan the architecture and create the monorepo for the frontend using Turborepo & NextJS.

JIDEP | Joint Industrial Data Exchange Platform for working towards a more circular industry

jidep.co

- Prepare and maintain the CI/CD pipeline using Github Actions to build docker images, store them in GHCR and then deploy in Digital Ocean's managed k8s cluster.
- i) Write smart contracts using Solidity ii) test them using mocha iii) deploy and interact using Hardhat and RESTful APIs developed using Express and ethers.js.
- Develop RESTful APIs using Express to manage different kinds of data in a distributed data storage using GunJS.
- Develop the platform using Odoo which uses python(MVC) in the backend and in the frontend it uses its own JS framework called OWL.

Albatross | A knowledge based engineering approach to develop better batteries for vehicles

albatross-h2020.eu

- Develop project's website using Vue.js.

🎓 EDUCATION

Jul 2021	B.Sc. in Computer Science and Engineering
Jan 2017	Shahjalal University of Science and Technology
	CGPA : 3.41 / 4.00
